SHEIN GCC Business Performance Dashboard Report

Executive Summary
This report analyzes SHEIN's commercial performance, supply chain operations, and operational risk management across GCC markets (Saudi Arabia, Kuwait, Bahrain, UAE, Qatar, and Oman) during 2020–2025.

Commercial Performance

• Total Revenue reached approximately 27 Billion.
• Saudi Arabia is the strongest revenue-generating market.
• Revenue growth showed significant volatility, with declines in 2020, 2022, 2024, and 2025.
• Logistics costs represent around 12.34% of total revenue.

Key Issue: Revenue growth instability and high dependence on the Saudi market.
Recommendation: Diversify growth across UAE, Qatar, Bahrain, and Oman while strengthening customer acquisition and retention programs.

Supply Chain Operations

• Total Logistics Cost reached 1.19 Billion.
• Shipping volume increased dramatically in 2025.
• High inventory levels exist across several product categories.
• Insurance costs account for the majority of logistics-related expenses.

Key Issue: Excess inventory and rising logistics expenses.
Recommendation: Improve demand forecasting, optimize inventory replenishment, and renegotiate logistics and insurance contracts.

Operational Control & Risk

• Product quality remains strong with 84.49% of inventory classified as Good.
• Damaged inventory represents 7.18%.
• Expired inventory accounts for 2.99%.
• Revenue targets were not fully achieved in several markets.

Key Issue: Inventory losses and underperformance against sales targets.
Recommendation: Strengthen quality controls, apply FIFO inventory practices, and improve market-specific sales strategies.

Strategic Priorities

1. Reduce damaged inventory below 3%.
2. Reduce expired inventory below 1%.
3. Stabilize revenue growth across GCC markets.
4. Lower logistics and insurance costs.
5. Improve inventory turnover and forecasting accuracy.
6. Expand customer acquisition outside Saudi Arabia.

Conclusion

SHEIN demonstrates strong revenue generation and a leading market position in the GCC region. However, fluctuations in revenue growth, inventory-related losses, and increasing logistics costs present important challenges. Addressing these areas will improve profitability, operational efficiency, and long-term business sustainability.
